YALE Symphony™ Delivers Wiegand Access Control

Lenoir City, TN -- Facilities can now add a design-oriented accent to their access control systems with the YALE Symphony lockset.

Symphony features a Wiegand open architecture platform that allows the lock to seamlessly interface with existing access control systems. Symphony works off third party software and accepts all HID 125 kHz proximity formats.

The lock enables complete door monitoring, with a built-in integrated door status switch (mortise locks), latchbolt monitor (mortise locks and exit devices), deadbolt monitor (mortise locks) and REX output (cylindrical locks, mortise locks and exit devices).

Symphony is available on YALE ANSI/BHMA Grade 1 cylindrical locks, mortise locks and exit devices. Additional options include the Reflections™ Series designer levers and MicroShield™ antimicrobial coating.
